

# Ecological Momentary Assessment

- Measurement is considered to be like classical physical measurement:

➡ It is very problematic to interpret measurement outcomes as properties of the theoretical object of measurement (interaction between instrument and object, by merely asking to rate “I feel happy today”)

➡ Measurement invariance, monotonicity, etc. do not hold

# Ecological Momentary Assessment

- Measurement is considered to be like classical physical measurement:

**Table 2.** Individual Moving Average Coefficients (0) Obtained through ARIMA Modeling.

Participant	GSE	PSW	PC	SC	APP	PS
1	0.58	0.65	0.70	0.66	0.63	0.69
2	0.35	0.46	0.48	0.50	0.45	0.46
3	0.58	0.65	0.75	0.63	0.56	0.68
4	0.66	0.56	0.60	0.59	0.64	0.53

**Table 3.** Individual  $\beta$  Exponents Obtained with Spectral Analysis.

Participant	GSE	PSW	PC	SC	APP	PS
1	1.17	1.15	0.95	1.00	1.15	0.95
2	1.13	1.39	1.36	1.24	1.27	1.23
3	1.09	1.05	0.96	1.34	1.12	1.11
4	0.96	1.14	1.02	1.18	0.95	1.05
