

Recursive Based Approach

• Essentially “model free”

- Few data assumptions

• **Can't quantify nonstatianarity, etc**

- Recurrence Networks can deal with multivariate time series data

Quantifying State Dynamics

Recurrence Based Approach

Quantifying State Dynamics

- Essentially “model free”
- Few data assumptions
- Can detect and quantify nonstationarity, etc
- Recurrence Networks can deal with multivariate time series data

Distance Matrix >> Recurrence Matrix
